★★★★★

Anker a great reliable product I have used for years in various formats.

Reviewed in the United States on January 29, 2024

Size: 10ft | Color: Black | Verified Purchase

The 10' length is great when you need the extra cable so as not to pull or stretch in awkward areas where the extra length is necessary. The main reason for the this purchase is my new phone which has a "C" connector vs my previous which was lighting connection. I also purchased other Anker cables in various connector formats due to my upgrade including "A" to "C" cables for power packs, etc. This purchase was also 25% off for a quality braided cable with no charging issues. It was great to find the little velcro tie included which helps to manage the length of cable when necessary.
